

Brunel Corporation guarantees all products will leave the factory in good condition. We warranty our products against defects in workmanship and material for a period of 365 days (one year) after shipment. Adjustments under this warranty will be made only after completion of inspection of the part or product in the factory. Liability under the warranty shall extend only to the replacement or correction of any part or product determined by Brunel Corporation inspection as not conforming to this warranty. All materials must be returned freight prepaid.

This warranty shall not apply to any product which shall have been repaired or altered without the manufacturer's knowledge and consent or operated or installed contrary to instruction or subjected to misuse, improper maintenance or is damaged by accident or negligence.

This warranty is made in lieu of all other warranties, express or implied, including merchantability or fitness for a particular purpose, and there are no other warranties that extend beyond this express warranty.

Brunel Corporation reserves the right to discontinue models or to change specifications at any time without notice. No discontinuance or change shall create any liability on the part of Brunel in respect to its products in the hands of its customers or products on order not incorporating such change even though delivered after any such change.

Rotating equipment is potentially dangerous and should be properly guarded. The user should check for all applicable safety codes in his area and provide a suitable guard.

### **Performance Assurance**

Rated torque and speeds of Brunel Corporation products are provided in current catalogs to assist the buyer in selecting the proper Brunel Corporation product. In addition, application assistance is offered by Brunel Corporation for guidance to the buyer in selection of a catalog product and application of custom designed products. Since the actual performance characteristics of all Brunel Corporation products in the buyer's application are the responsibility of the buyer, performance assurance is usually accomplished through manufacture of a prototype by Brunel Corporation, and a test or qualification program on the part of the buyer.
